

# Whitelisting Catholic Social Media to Receive Our Emails

08/08/2023 2:17 pm CDT

Because emails from Catholic Social Media often contain pictures and links, they can get misidentified as spam by your email provider. Here's what you can do to make sure that doesn't happen:

- **Gmail:** Move any message from the @catholicsocial.media domain to your primary inbox:
  - **On your phone?** Hit the 3 dots in the top right corner, click "move to" and then "primary."
  - **On your computer?** Back out of an email and drag and drop that email in the "primary" tab near the top of your screen.
- **Outlook:** Right-click on any email from us, scroll down to "Junk" and choose "never block sender."

Also, you can check out [short video tutorials](#) to learn how to do this:
