# How to Use Content Tags

08/22/2023 3:22 pm CDT

You can easily categorize all of the social media content and resources you create by adding content tags.

To create a content tag, you can click on your profile > Manage Content Tags.

From there, simply type your tag name and click "Add Content Tag."

NOTE: Once you start tagging content with a tag, you won't be able to delete that tag, so choose your tags wisely!

Now, while creating content and resources, you can have that tag as an option.
