How to Deal With Spam Comments

02/19/2024 2:52 pm CST

Sometimes, you may find your page, posts, or livestreams are receiving more spammy comments than usual.

Here are a few steps you can take to get rid of them and minimize them in the future.

- **Report Spam on Facebook**: Navigate to the offending post or comment, click the three dots at the top right, choose "Report," and select "Spam or misleading content."
- **Block Troublesome Users**: To block someone, visit their profile, click the three dots at the top right, and select "Block." This stops them from seeing or commenting on your posts.
- **Implement Spam Filters**: Use available spam filters to automatically block spam comments on your page. Visit this tutorial for more.
- **Set Up Moderation Rules**: Create rules to automatically remove spam comments from your page. Visit this tutorial for more.

- **Additional Tips**:
    - **Be Cautious with Links**: Avoid clicking links in spam comments to prevent visiting malicious websites.
    - **Ignore Spam Comments**: Do not respond to spam, as this can encourage spammers.
    - **Keep Your Page Updated**: Regularly update your profile information and privacy settings to ensure they are current and set to your preferences.
