How to Link Directly to a Category in Resources

09/15/2025 10:23 am CDT

You can create direct, unique links for all of your categories and subcategories in order to send parishes, schools, and other organizations directly to the items you need them to access.

To copy the unique link for a given category:

1. Go to the Resources section

2. Click on the category and/or subcategory you want to link to

3. Click the "copy" icon next to that category or subcategory

4. Now, you can paste that link into your newsletter, email, or other communications with organizations.
